

A large crowd of sheep, mostly white and grey, are packed closely together, looking directly at the camera. The sheep fill the entire frame, creating a dense, textured background.

PGG Wrightson

WELCOME

The Tripp/ Veronese family warmly welcome's you to our first Snowdon on-farm ram sale, our 40th year selling Perendale rams and ninth year selling Suffolk rams. We are very proud to continue the family tradition of breeding rams started in the 1940's by my grandparents, and continued by my parents, Tony and Nicky, with their passion for sheep breeding and genetics. The 200 catalogued rams for sale represent our three breeds farmed here at Snowdon Station in Canterbury up the beautiful Rakaia Gorge. Thank you all for coming and for your support on this auspicious day.

PROPERTY FACT SHEET

Snowdon is a High Country property which runs from 550 to 1400 m above sea level, with long cold winters and climatic extremes. We run 5600 commercial Perendale ewes which are the testing ground for our genetics. We run 550 Perendale stud ewes, 350 Suffolk

stud ewes, 250 in calf Angus cattle and all the young stock. We also run a small Cheviot stud.

Our aim is to produce productive maternal and terminal sire sheep that will add value to anyone's commercial sheep flock, wherever you farm. All of our stud sheep have DNA parentage and are genomically tested to enhance data accuracy and are lambed largely on the tussock, unassisted. They are all performance recorded on SIL and all ram hoggets are wintered at Snowdon. Rams from all studs are tested and used exclusively in our own commercial flock. Our commercial lambs are all sold at our on farm lamb sale in January.

All stud sheep are run in large mobs under commercial conditions. We dagscore, footscore for footrot resistance, and cull hard for worms. We use both CARLA and FEC to understand our worm status and use a scientific approach in all aspects of production for animal selection. We currently have a small facial

eczema subflock based on Raupuha genetics and look forward to being able to genetically test animals for this important commercial trait in the future. We are working to identify high IMF animals at eye muscle scanning and have CT scanned rams to provide higher accuracy for carcass traits. We will have Romdale and Coopdale rams available at next year's sale.

BREEDING OBJECTIVES

Perendales For our Perendale stud, genetics play a central role in maintaining high production levels and consistent performance and breed type across all age groups. Maternal traits including mothering ability, temperament, body condition and ewe efficiency are key to our breeding programme. Specific emphasis is placed on fertility, early growth, meat, lamb survival, wool production and ewe lifetime performance. We aim to produce strong deep barrelled sheep that have good constitution, resilience and lifetime performance.

Suffolks The aim of our Suffolk stud is to produce meaty, thick boned terminal sire sheep with hardy genetics that will shift well to other environments and last. Our breeding objectives focus specifically on early growth, meat and survival while maintaining good constitution, structure, conformation and thickness. They are wintered in large mobs and culled vigorously. We aim to produce Suffolks that will perform well in any environment and produce terminal sire lambs from any maternal ewe.

We work hard with both of our flocks to link with other breeders and breeds around NZ which gives us high data accuracy. Good linkage within the sheep industry is very important for continued genetic improvement.

COMMENT

Bidr is available at our sale for those of you who can't make it in person. For those of you who have bought rams privately in the past, thank you for your ongoing support and understanding around the change in sale structure. Please get in touch if you require any information or need assistance with ram purchases. We appreciate any feedback and look forward to hosting you all on the 6th of December.

Thank you to staff, family and community for your wonderful continued support

Best wishes for Christmas and the new year ahead

Annabel Tripp and family

CONDITIONS OF SALE

1. All intending purchasers must register at the PGG Wrightson Ltd Livestock (PGW) and Hazlett sales office prior to the sale.

The New Zealand Stock & Station Agent's Association Conditions of Sale apply. These terms can be inspected at the registration desk and on the wall in the auction room.

Hazlett's / PGW's Monthly Account Terms of Trade also apply to the extent deemed relevant by Hazlett/PGW. The current versions of Hazlett's/PGW's Monthly Account Terms of Trade are also available online.

2. Sheep will be offered as catalogues, subject only to final draft.
3. All intending purchasers must register prior to commencement of sale.
4. Each lot shall become the property and responsibility of the purchaser on the fall of the hammer.
5. Terms will be strictly cash before taking delivery of any animal unless prior arrangements are made with the auctioneers. Accounts not paid within 14 days

of the sale shall bear interest at current rates per annum from date of purchase.

6. Sale will be conducted GST exclusive.
7. Purchasers must give complete delivery instructions to the office using the delivery instruction sheets in the back of the catalogue, and receive delivery docket before removing the animals.
8. The description of the sheep in the sale are supplied by the individual vendor who alone is responsible for their accuracy.
9. The vendor guarantees the structural soundness of all rams offered in the sale for six months.
10. The vendor reserves the right to alter the order of sale.
11. Under Health & safety regulations all visitors must take care and responsibility on sale day for their own safety.
12. Any rams sold for a transfer or to a SIL recorded flock will be a minimum of \$4000.

Disclaimer

All details and descriptions as to stock listed in this catalogue have been supplied to the auctioneers by the vendor, and although every care has been taken to ensure accuracy in the reproduction of such details and descriptions, the auctioneers and their employees do not accept any responsibility as to mis-descriptions, errors omissions or mis-statements contained therein including those mis-descriptions, errors omissions or misstatements caused either directly or indirectly by the negligence of the auctioneers or their employees.

UNDERSTANDING NZGE INFORMATION

The data used to populate this catalogue is generated by The New Zealand Genetic Evaluation (NZGE) which is managed by Beef + Lamb New Zealand (B+LNZ) Genetics.

THE NEW ZEALAND GENETIC EVALUATION

The NZGE is the national across-flock and across-breed sheep evaluation that identifies the best rams for economic traits. It objectively “compares” the performance of various traits – making it a powerful source of genetic information for breeders and commercial farmers.

MEASURES OF GENETIC MERIT

Breeding values are termed as “gBV” (genomically informed breeding value). For simplicity, the breeding value for animals with no genomic information is still denoted as gBV, as it comes from the same analysis.

They are expressed in the units the trait is measured in (e.g. kg for weight, number of worm eggs in faeces) and are an estimate of the value of a ram’s genetic merit for the trait. Generally, a more positive gBV is more favourable, but there are some exceptions (e.g. less worm eggs are more favourable).

Indexes are created with the commercial farmer in mind. An index is an economic value applied to a grouping of gBVs. A positive economic value is always more favourable.

The complete package of DNA testing services
working together to maximise your ROI and
fast-track your breeding program.

2024

Proud finalist for
Datamars Livestock
Technology Award

Beef+Lamb
New Zealand AWARDS

ultimate

A full flock parentage and genomic program on **SHEPHERD Select** plus allocations* of **SHEPHERD Connect**.
Annual cost: \$34 per ewe scanned in lamb**.

complete

A full flock parentage program on **SHEPHERD Ultra** plus allocations* of **Shepherd Select/Connect**.
Annual cost: \$26 per ewe scanned in lamb**.

ultra

Parentage identification testing that will save you money by simplifying mating, saving autumn pasture and increasing lamb survival. MyoMAX®, LoinMAX® and LambMAX® gene tests are included.

select

Parentage verification and genomic testing for young animals to accurately identify genetically superior candidate sires or ewe replacements.

connect

Parentage verification and higher density genomic testing for sires to ensure strong linkage to the reference population for current and future progeny.

For more information contact your Zoetis Genetics Area Manager

NORTH ISLAND: Dayanne Almeida | 027 208 5501 | dayanne.almeida@zoetis.com

SOUTH ISLAND: Ryan Teutenberg | 027 549 3506 | ryan.teutenberg@zoetis.com

Zoetis is a Sheep Improvement Limited (SIL) accredited lab for DNA parentage and genomics. All prices excluding GST and

**excluding initial sampling of sires/dams. Prices correct as of October 2024.

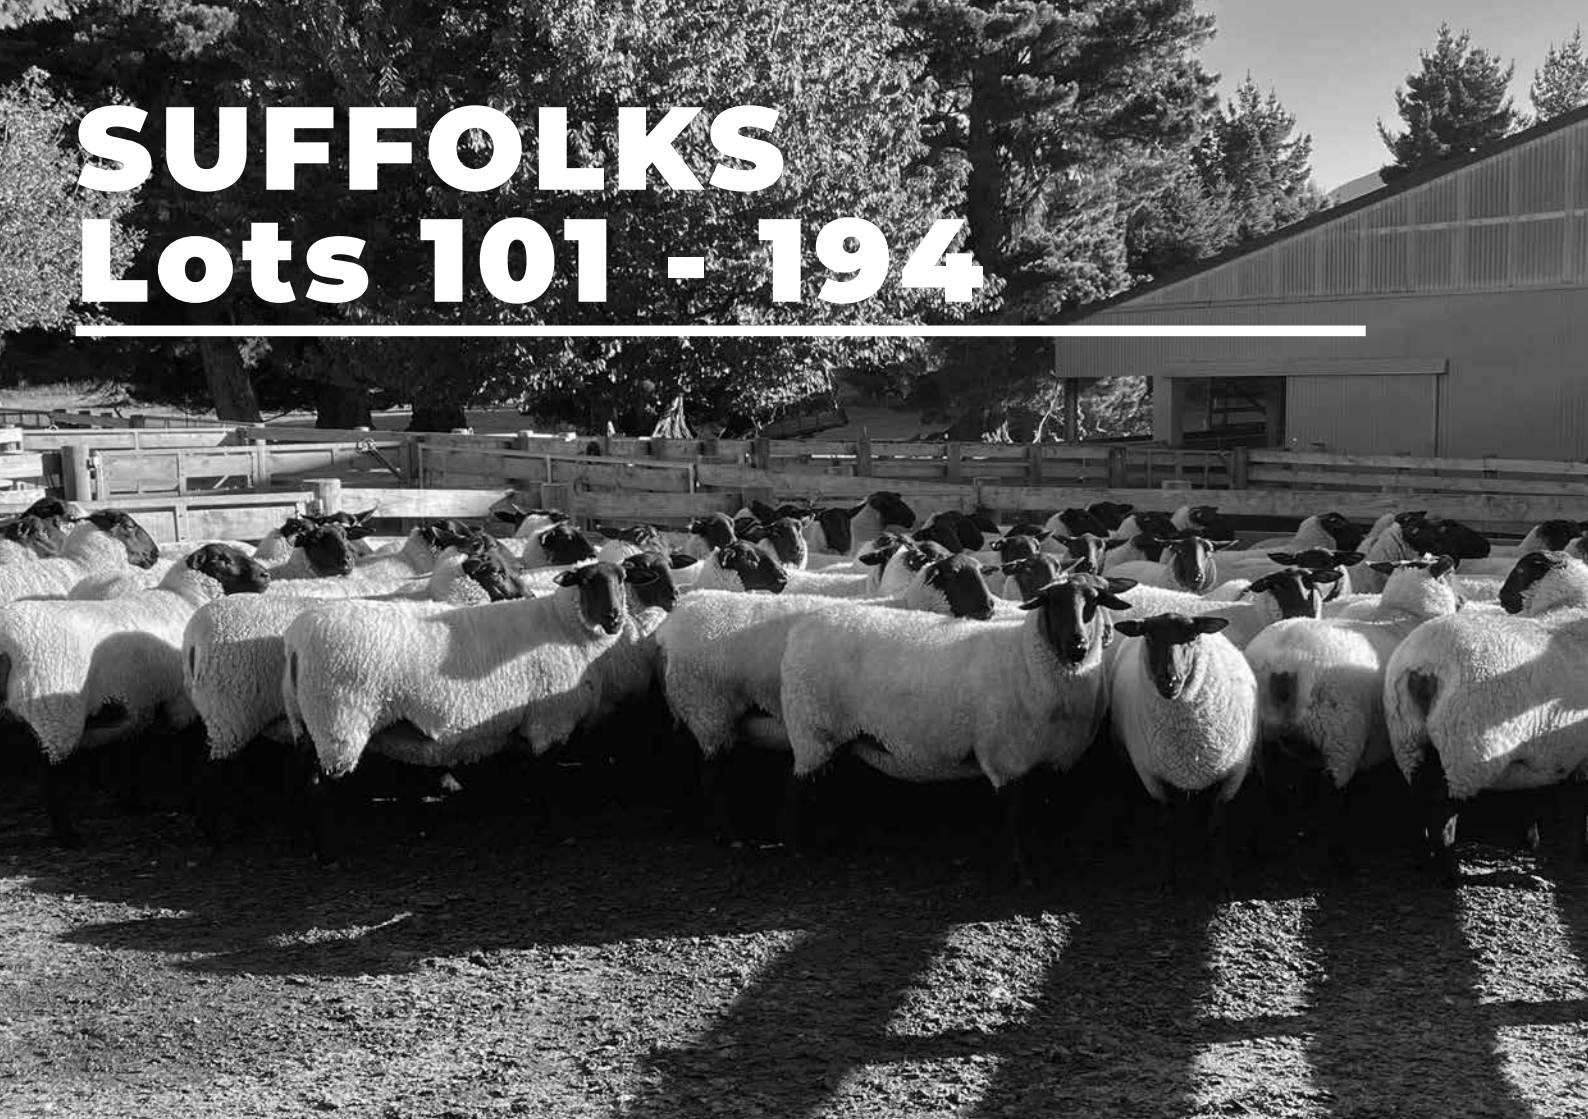

*Contact your Zoetis Area Manager to discuss how this allocation is calculated. www2.zoetis.co.nz/products-solutions/genetics
