

THE GUMS
STEVENSON GENETICS

RAM SALE 2025

Wednesday 15th

January 2025

727 Leamington Road, Cheviot.

Inspection from 9am

Sale commences:

Terminal Sires: 11am (Outcry Auction)

Fine Wool Sires: 2pm (Helmsman Auction)

**QUARTERBRED - POLL MERINO - HALFBRED
DORSET DOWN - SOUTH DORSET DOWN**

PRE-SALE RAM VIEWING

**Friday 10th January
1:00pm – 4:00pm**

**An opportunity to view The Gums rams
on offer at this year's sale in a
relaxed setting free of any
sale day time pressures.**

Rams will be yarded for close inspection.

**QUARTERBRED – POLL MERINO – HALFBRED
DORSET DOWN – SOUTH DORSET DOWN**

www.thegums.nz

Foreword - The Gums

Welcome to The Gums, Stevenson Genetics 2025 Ram Sale. We are proud to present this year's selection of rams, reflecting our ongoing commitment to developing genetic packages that meet the needs of enduring farming businesses.

At The Gums, our breeding philosophy is built on balance—producing sheep that are highly productive while also excelling in health, welfare, and longevity. This approach ensures the animals we offer perform consistently across a variety of farming systems, contributing to both immediate results and long-term sustainability.

Terminal Sires – Dorset Downs and South Dorset Downs

Our terminal sires are bred with one goal in mind: fast-growing lambs that allow farmers to capitalise on spring's growth potential. These rams deliver high performance in terms of growth rates, enabling you to maximise weaning weight. By focusing on traits that drive early growth, we aim to help you maximize returns during the critical spring window, ensuring lambs hit market specifications with minimal input costs. Rams must also last – our rams are not pampered, with the view that they must be mating ready. Fit and ready to serve.

Fine Wool Sires – Quarterbred, Halfbred & Poll Merino

Our fine wool sires are developed to build a durable, reliable and productive ewe base. These rams combine production traits – growth, fertility, wool production, doability; and health and welfare traits – footrot resistance, worm resistance, low dag, durability; creating sheep that can thrive across variable seasonal conditions. We believe a ewe flock must be elastic—able to maintain solid performance during tough seasons while taking full advantage of favorable conditions to “cream it” when times are good. This elasticity ensures both resilience and profitability in the long term, for both the flock itself and the wider farm business.

Bidr

Both the Terminal and Fine Wool sales will be interfaced with bidr this year. The Terminal sale will be a hybrid auction, in the same manner as regular bidr auctions run. In a new innovation, we are working with bidr to allow live bidding in the Helmsman auction board – a bid on bidr will update the board, as if a person on-farm made the bid.

Dorset Down and South Dorset Down Ewe Sale

Looking ahead, we would like to announce the Dorset Down and South Dorset Down ewe sale, scheduled for February in an on-farm sale. This presents a rare opportunity to acquire proven ewes bred with the same dedication to growth, productivity, and profitability. The Dorset Down ewes will be sold in single units, while the South Dorset Downs will be sold in packages of 10 to 15 ewes. This sale will be held on 10th February.

We deeply appreciate the trust and support of our clients, both long-standing and new. Your success drives us to continually improve and deliver genetics that make a meaningful impact on your farming operation.

We look forward to seeing you at the 2025 Ram Sale. Please don't hesitate to reach out with any questions—we are here to support you every step of the way.

Mark & Joanne Stevenson

Index

TERMINAL SALE 11am

Dorset Down	Lots 1 - 32
South Dorset Down	Lots 33 - 61

FINE WOOL SALE 2pm

Quarterbred	Lots 1 - 44
Poll Merino.....	Lots 45 - 55
Halfbred	Lots 56 - 132

Conditions of sale

1. This sale will be conducted under the New Zealand Stock & Station Agents Association Conditions of Sale. When proceeds are credited or a purchase is debited to a Hazlett account the companies terms and conditions apply to the extent deemed relevant. These terms can be inspected at the registration desk and on the wall in the auction room. The current versions of Hazletts terms and conditions are also available on their websites.

www.hazlett.nz/content/uploads/2021/07/Terms-of-Trade-Hazlett.pdf

2. Each lot shall become the property of the purchaser at the fall of the hammer.
3. Finance terms are strictly cash prior to delivery unless credit arrangements have been made with the Auctioneer prior to the sale.
4. The entry of rams in this catalogue constitutes a guarantee of fertility. Any disputes shall be settled by an Arbitrator appointed by the Auctioneer.
5. Although all care has been taken to ensure the accuracy of the information contained in this catalogue, no responsibility is accepted for any error or omission.
6. The Sale will be conducted exclusive of GST.
7. A 6% rebate commission will be paid to outside companies introducing buyers to the selling company at least 24 hours prior to the sale.
8. **Transport:** Leave full and explicit instructions in regard to transport
9. **Insurance:** The Selling Agents can arrange insurance on any stock.
10. Upset Price: Terminal Breeds: \$600 at auction, any passed rams \$700.
Fine Wool Breeds: As per reserves on Helmsman Auction Whiteboard.
11. If a transfer is required the transfer price will be \$2,000.

Overseas Export

12. Prior to auction - Purchasers who wish to export the animal/s ("Export Purchasers") must advise the auctioneers at least 2 hours prior to the sale commencing that they are considering purchasing specific breeds at the auction. The Auctioneers will then advise all vendors of relevant breeds that their animals are being considered for export. Vendors not wishing to have their animals considered for export are to advise the Auctioneers.
13. Purchase at auction by Export Purchasers is conditional upon the animal/s purchased passing all relevant export protocol and testing (conducted at the Export Purchaser's expense). Full payment (plus GST) will be made at the fall of the hammer to the Auctioneers as per usual terms and conditions. Payment will be held by the Auctioneers until the animal/s leave New Zealand. Payment will be refunded to the Export Purchasers less all associated export costs for any animal/s purchased failing export protocol and testing.

ALL RAMS ARE VET TESTED AND ACCREDITED BRUCELLOSIS FREE

OSH Every effort will be taken by the Vendors, Hazlett, their staff and assistants, both on the sale day as well as any visits of inspection to ensure the safety of intending buyers and visitors. We wish however to advise that while this sale is run under normal management conditions, certain dangers exist in relation to livestock and their environment. Visitors should take care to ensure their personal safety.

Animal Health

- 1. All rams are vet tested and accredited brucellosis free
- 2. The Gums Rams are on a 10 in 1 Vaccination programme and received a booster Covexin vaccination in 2nd September 2024.

Liveweight and Scanning Dates

Breed	Weaning	Autumn	Yearling Weight	Eye Muscle Scan
Terminal Sires	21/11/23	14/2/24		14/2/24
Quarterbreds	20/12/23	10/5/24	2/9/24	10/5/24
Stabilised Halfbreds	8/1/24	10/5/24	2/9/24	10/5/24
First X Halfbreds	16/1/24	10/5/24	2/9/24	10/5/24
Poll Merinos	20/12/23	10/5/24	2/9/24	10/5/24

Shearing Date

29 August 2024

Estimated Breeding Values

Australian Sheep Breeding Values (ASBV's) Are presented for Quarterbreds, Stabilised Halfbreds and Poll Merinos. Information to assist with the interpretation of these are provided on page 8. Please don't hesitate to ask Mark for assistance in understanding these or email: mark.stevie@gmail.com

EXPLANATIONS OF COMMONLY USED SIL DATA	
eBV	eBVs (estimated breeding values) are expressed in the units the trait is measured in, and are an estimate of the value of the ram's genetic merit for the trait
WWT eBV	Weaning weight - "lamb growth"
LW8 eBV	Body weight at 8 months of age - rates animals for post-weaning growth
EMA eBV EMAc eBV	Eye muscle area Eye muscle area corrected for carcass weight - a measure of muscularity
FAT eBV	Weight of fat in carcass
NZTW index (previously TSO)	New Zealand Terminal Worth is expressed in cents and is an estimate of genetic value for growth (TSG), meat yield (TSM) and survival (TSS).
Rank	Ranks represent the position in the flock-birth year cohort of rams present at weaning (for WWT eBV), at autumn LW (LW8 eBV), at scanning (meat trait eBVs, NLB eBV & indexes) and at shearing (FW12 eBV).

Footrot Resistance

Resistance to footrot is a trait we have been working on here for a number of years – across all breeds. To achieve this we have used a number of tools, including culling susceptible animals, the Lincoln University Footrot Score, and more recently the Footrot Breeding Value.

This year we were unable to get sufficient animals infected with footrot to be able to score them. While the ram hoggets were exposed to footrot, we were unable to get sufficient animals infected to be able to score them for the footrot breeding value. The few animals that got infected with footrot were culled.

Some animals have footrot resistance breeding values presented in the catalogue. Those breeding values are generated solely on their pedigree, rather than that animal's performance under a challenge.

While it is frustrating that we couldn't collect individual performance data on this trait, it is a major positive that when exposed to footrot over a long period of time, very few animals in the mob became infected.

Helmsman Auction Explanation

How it works:

1. Buyers register on arrival and receive a buyer's number.
2. Rams will be available for inspection from 11am. Buyers can look at them at any stage during the sale without time pressure.
3. When the sale commences at 2pm all rams will be on the market simultaneously. Buyers can bid on any ram by writing their bid on a card and handing it to the front desk.
4. Bids are recorded on a whiteboard, with the leading bid and buyer number recorded on each lot. Buyers can see when they lead the bidding or are outbid on any lot and can bid on any number of rams they wish.
5. If a ram exceeds a buyer's budget they can bid on their next choice ram and can reinspect rams at anytime.
6. The auction will run for somewhere between 30 minutes and an hour. After this time, bids must be placed within 2 minutes. Each time a bid is placed near the end of the auction, the timer will start for another 2 minutes. The time periods used are at the discretion of the sale commentator.

Understanding MERINOSELECT ASBV's

At The Gums we are utilising MERINOSELECT ASBV's as a tool to assist us and our clients in breeding profitable sheep. Breeding Values are a tool to assist in selection. In our view, they should be used alongside visual assessment of an animal and its suitability for your needs.

The catalogue presents ASBV's for Quarterbreds, Stabilised Halfbreds and Polled Merinos.

The following Information is provided to assist you in understanding the information presented alongside each of the lots.

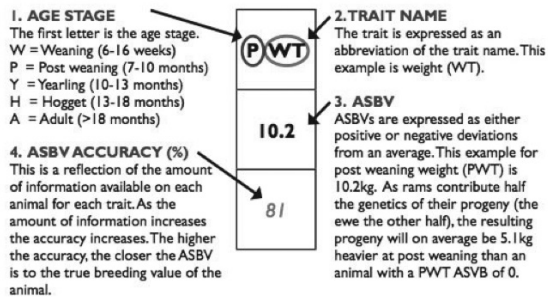

What are ASBV's

ASBV's are the units of measurement MERINOSELECT use to analyse animals.

Australian **S**heep **B**reeding **V**alues are an estimate of an animal's breeding value based on pedigree and performance recorded information. They are essentially a projection of how that animals progeny will perform for a range of traits.

The diagram illustrates how to interpret an ASBV.

ABBREVIATIONS DEFINITION	
PWT (kg) Post Weaning Weight	Rams with a more positive Post Weaning Weight will, on average, produce lambs that grow faster and are heavier at 7 – 10 months.
YWT (kg) Yearling Weight	Rams with a more positive Yearling Weight will, on average, produce lambs that grow faster and are heavier at 10 - 13 months.
YFAT (mm) Yearling Fat	Rams with a more positive Yearling Fat ASBV will, on average, produce progeny with a higher fat depth at a constant weight.
YEMD (mm) Yearling Eye Muscle Depth	Rams with a more positive Yearling Eye Muscle Depth ASBV will, on average, produce progeny with more muscling at a constant weight.
YCFW (%) Yearling Clean Fleece Weight	Rams with a more positive Yearling Clean Fleece Weight will, on average, produce progeny that cut more wool.
YSL (mm) Yearling Staple Length	Rams with a more positive Yearling Staple Length will, on average, have greater genetic potential for longer fibre length.
YFD (micron) Yearling Fibre Diameter	Rams with lower FD ASBV's will produce progeny that have finer wool.
FR Footrot	Rams with a more negative FR ASBV will produce progeny with a higher genetic potential to resist footrot infections. Lower FR ASBV's are desirable.
YWEC (%) Yearling Worm Egg Count	Rams with more negative WEC ASBV's produce progeny who have a higher genetic potential to resist worm burdens. Lower WEC ASBV's are desirable. WEC ASBV's are expressed as a percentage relative to a count of 500 eggs per gram.
LDAG Late Dag	Rams with more negative LDAG ASBV's will produce progeny who have less dag. Dag is recorded as a score, where a lower score indicates less dag (therefore lower LDAG ASBV's are desirable).

North Canterbury
**VETERINARY
CLINICS LTD.**

Since 1954, we've been working in partnership with the local farming community for improved animal health to achieve better production.

We provide a wide range of advanced Veterinary and Technical Services and welcome talking with you about how these can improve performance and profitability.
